RPSTL Edit

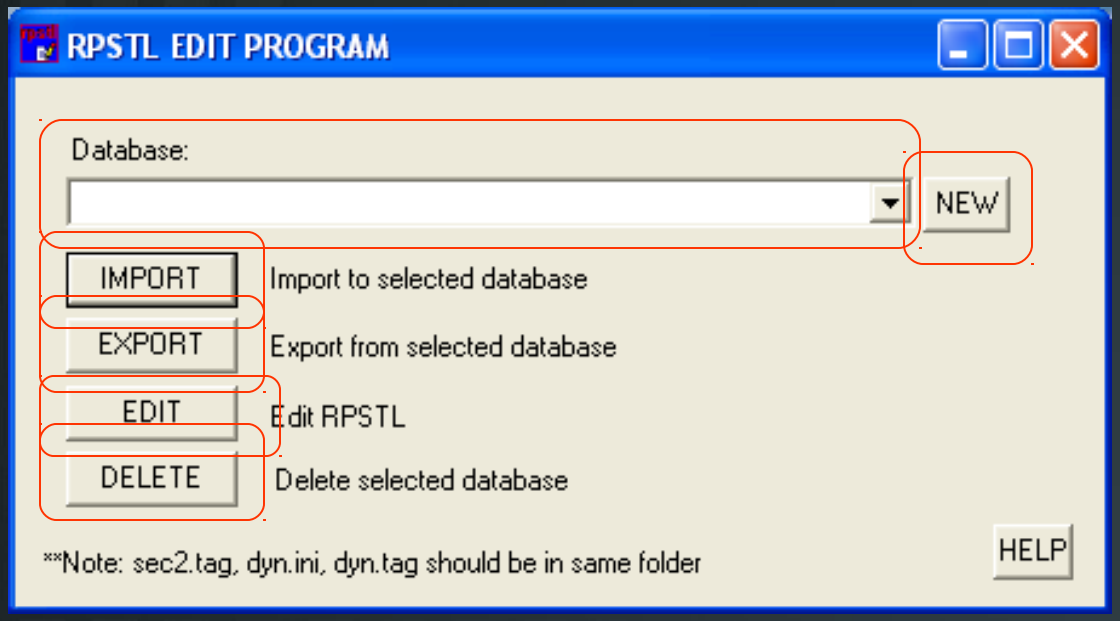
Christy Campbell

RPSTL Edit

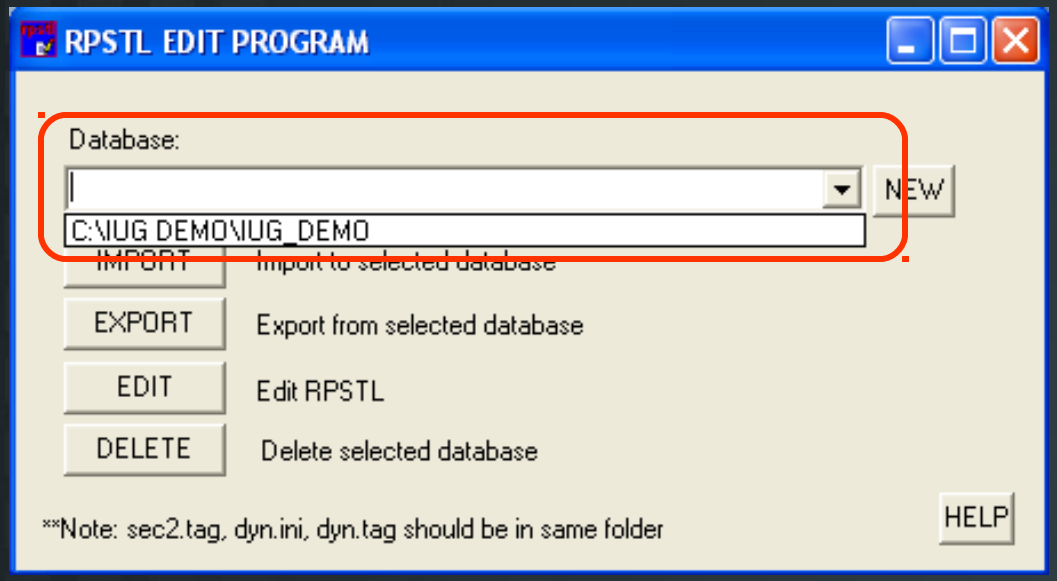
An interface to provide editing of:

- Section 2 data
- Reference Designator data
- Dynamic data

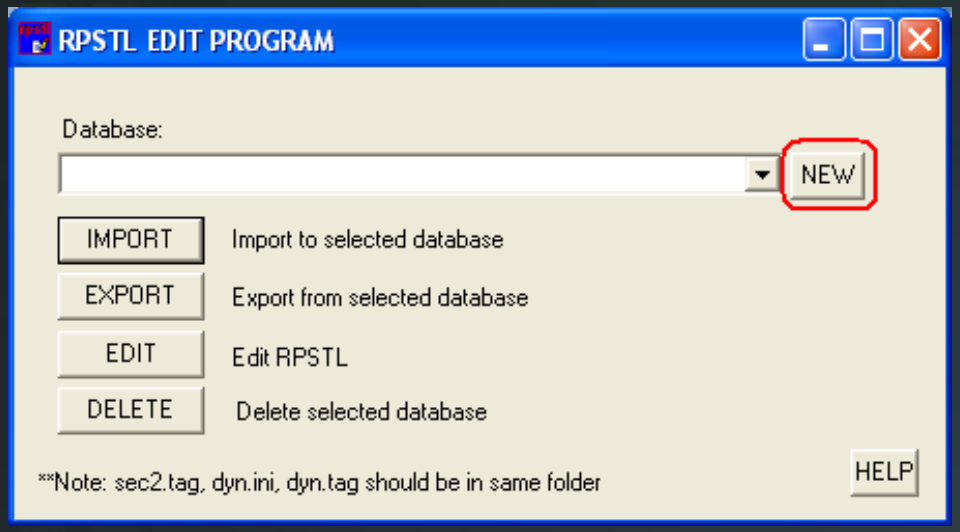
RPSTL Edit Dialog



Selecting a Database

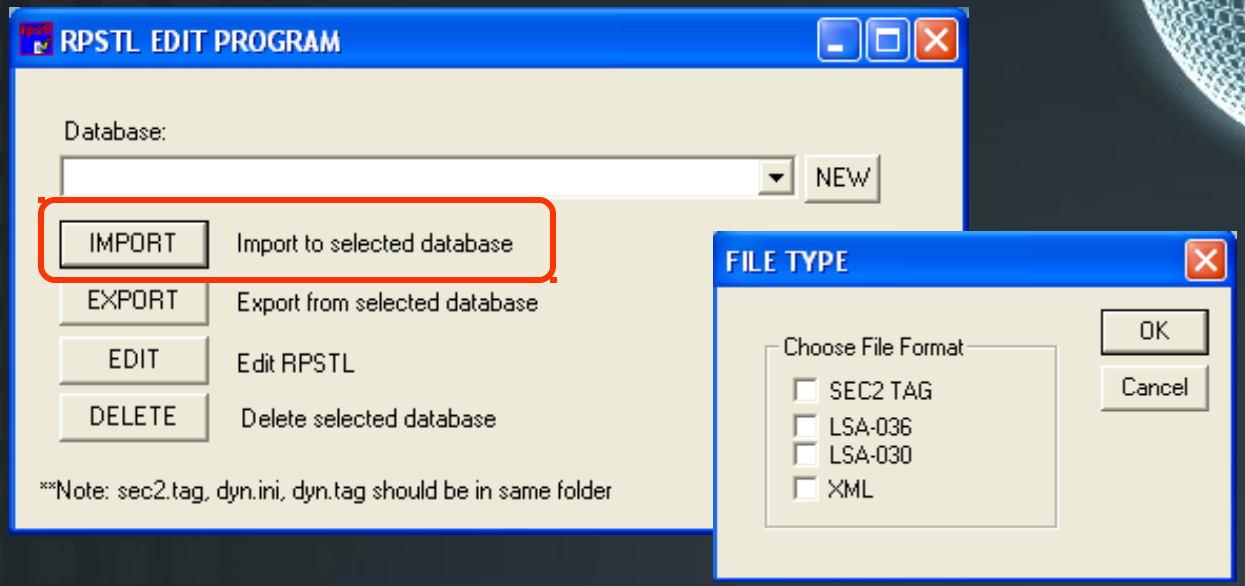


Creating a New Connection



- Pressing <NEW> begins the process of creating a new database connection using Microsoft's Open Database Connectivity (ODBC) Administrator.
- The database for which the connection is being made can either be created or selected during this process.

Importing Files



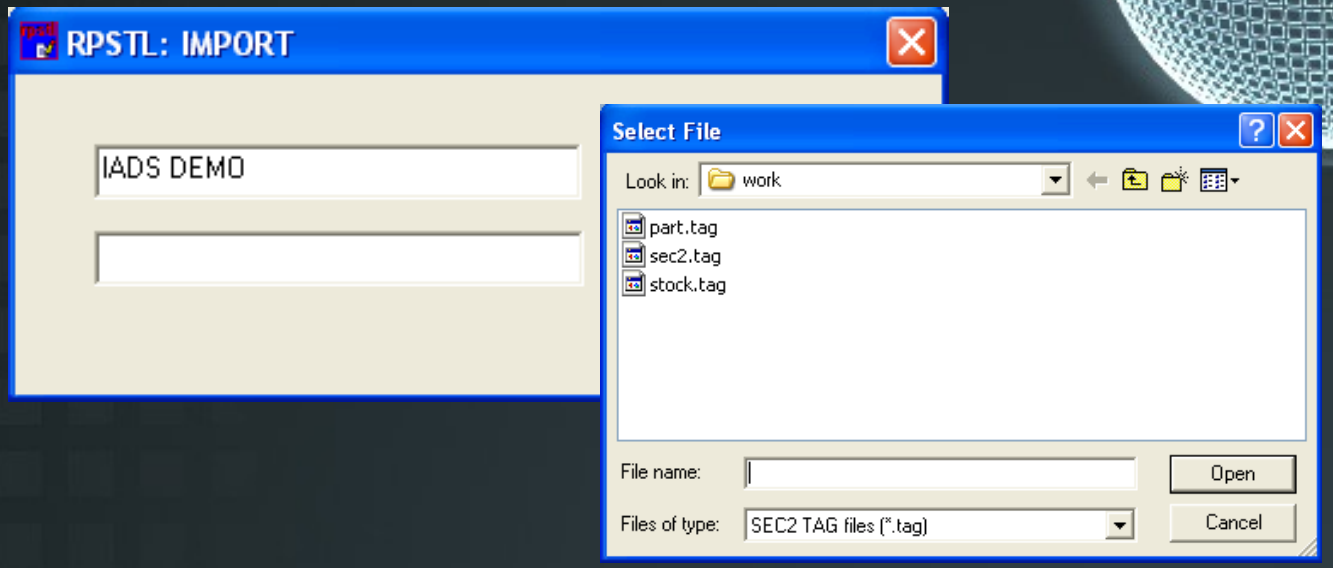
- Pressing <Import> begins the process of importing files into the RPSTL Edit database.
- A dialog opens that allows the file type to be selected.

Import Capabilities

RPSTL Edit can import the following files and reports:

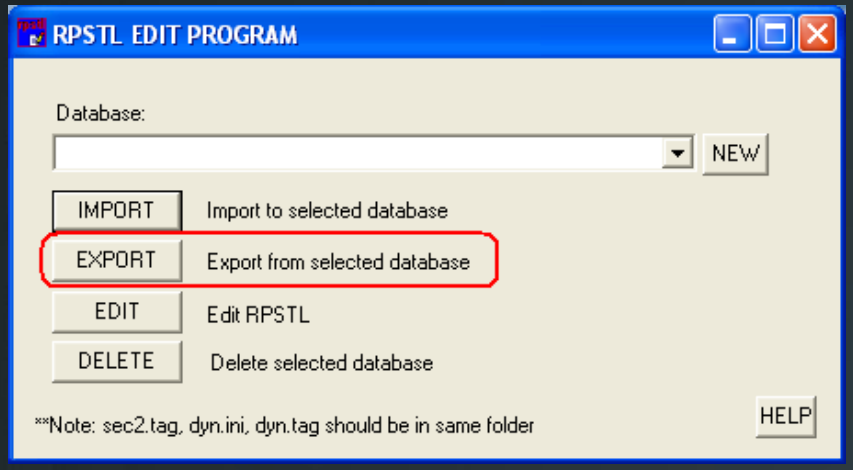
- Section 2 tag
- Reference Designator text
- Dynamic tag
- LSA-030 report
- LSA-036 report
- XML tag files

Importing Files



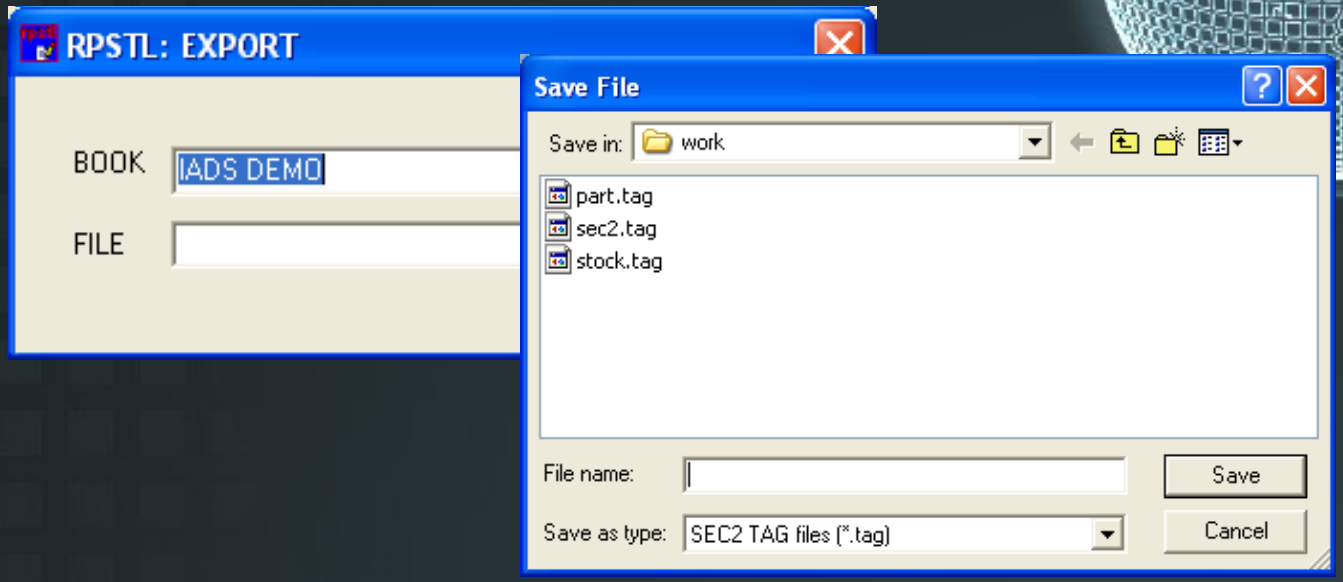
- After a file type is selected, the RPSTL Import Dialog opens and the Book Number can be specified.
- Press <Import> to select the file to be imported from the Select File dialog.
- After import is complete, the user is returned to the RPSTL Edit dialog.

Exporting Files



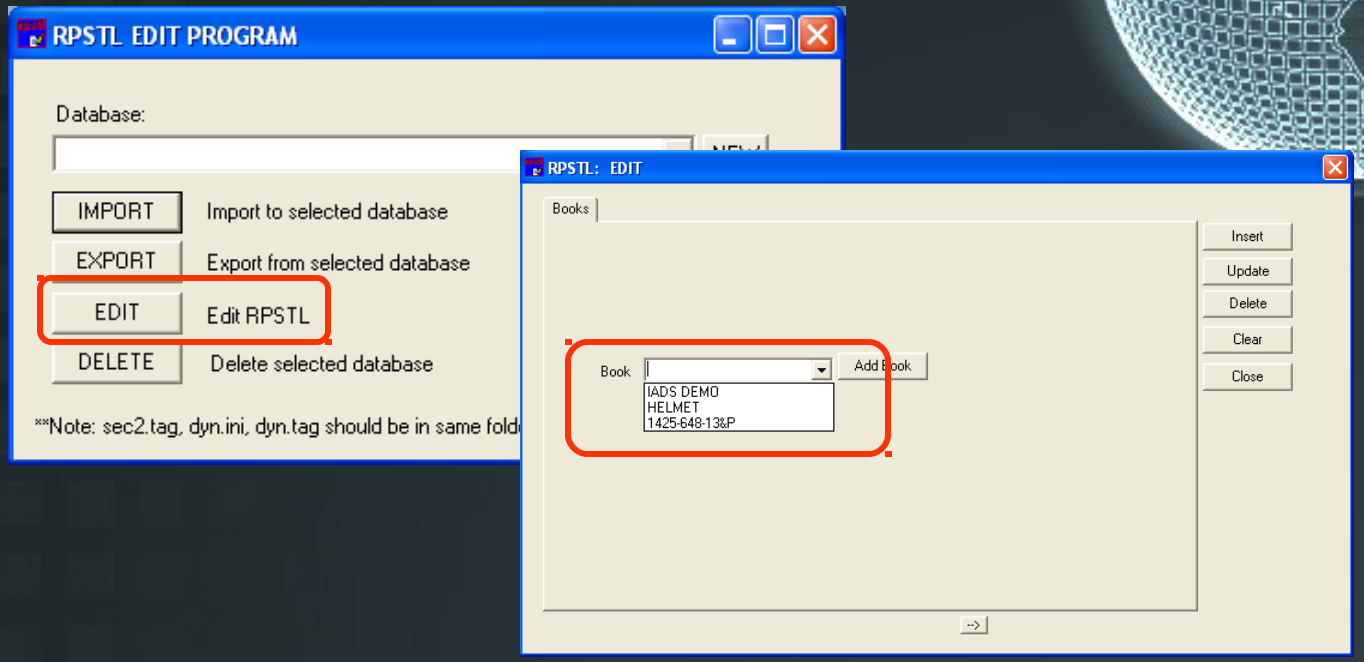
- Pressing <Export> begins the process of exporting files from the RPSTL Edit database.

Exporting Files



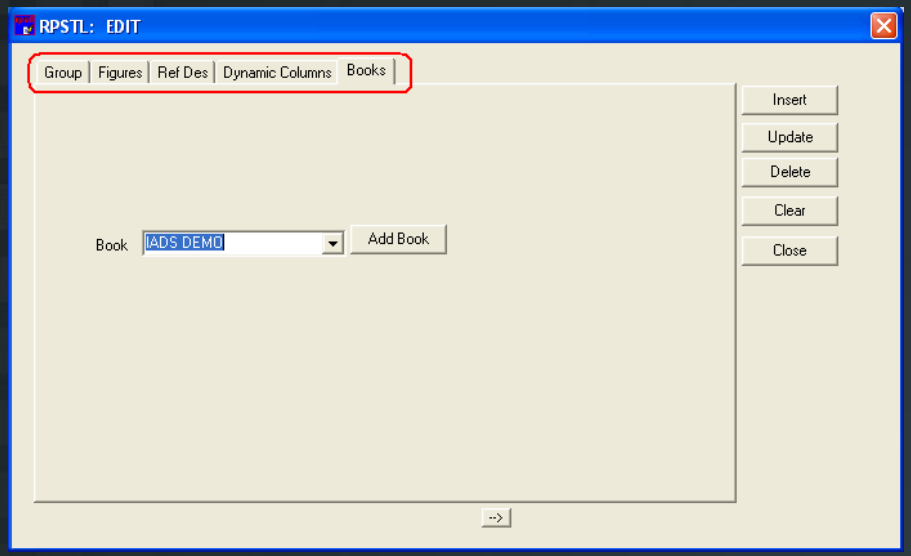
- The RPSTL Export Dialog opens and the Book Number can be selected.
- Press <Export To> to select the name and location of the file in the Save File Dialog.
- After export is complete, the user is returned to the RPSTL Edit dialog.

Editing a RPSTL



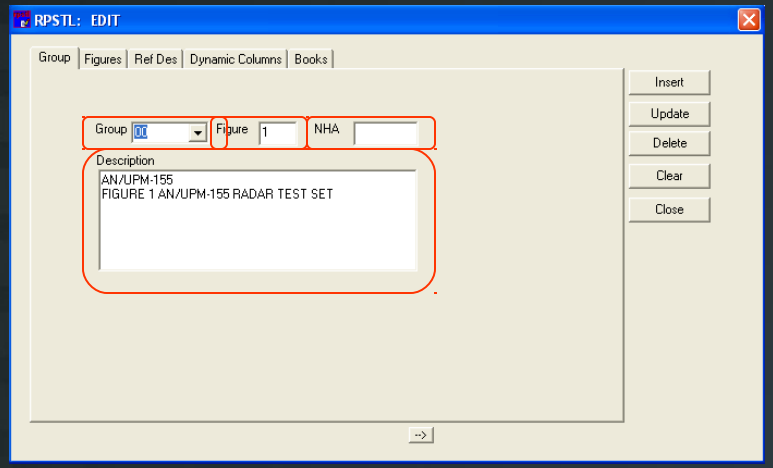
- Pressing <Edit> opens the RPSTL Editing dialog.
- A book selection should be made to begin editing.

RPSTL Edit Tabs



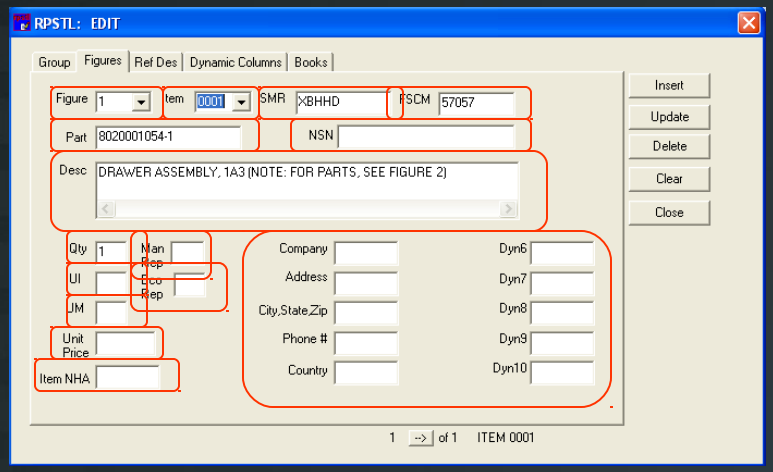
- After a RPSTL book selection is made the Groups, Figures, RefDes, and Dynamic Columns Tabs are added to the dialog and the RPSTLs data is loaded into the forms.
- Click on a tab to view the associated data.

Edit Groups



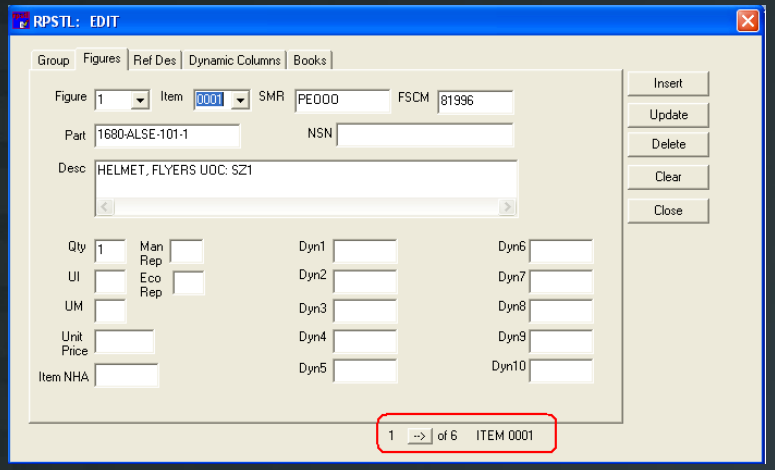
- The Groups Form includes:
  - Group Number
  - Figure Number
  - Group Next Higher Assembly (NHA)
  - Group Description

Edit Figure Items



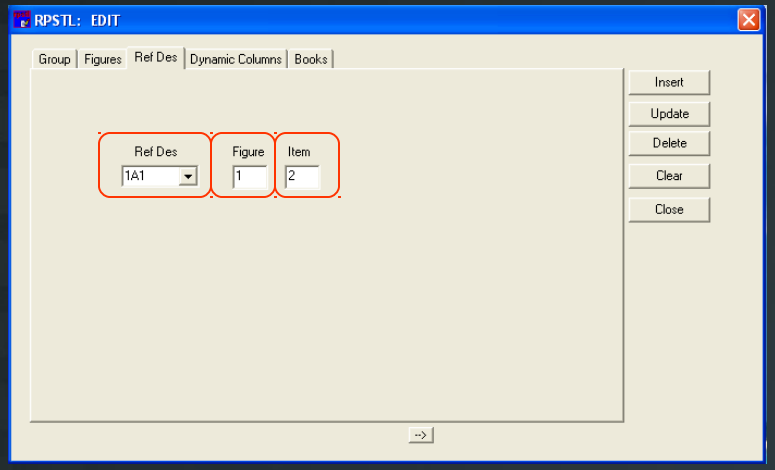
- The Figures Form includes:
  - Figure Number
  - Item Number
  - SMR code
  - Cage Code (fscm)
  - Part Number
  - Stock Number (nsn)
  - Description
  - Quantity
  - Unit of Issue (ui)
  - Unit of Measure (um)
  - Unit Price
  - Item NHA
  - Mandatory Replacement
  - Economical Replacement
  - 10 available dynamic fields.

Multiple Item Numbers



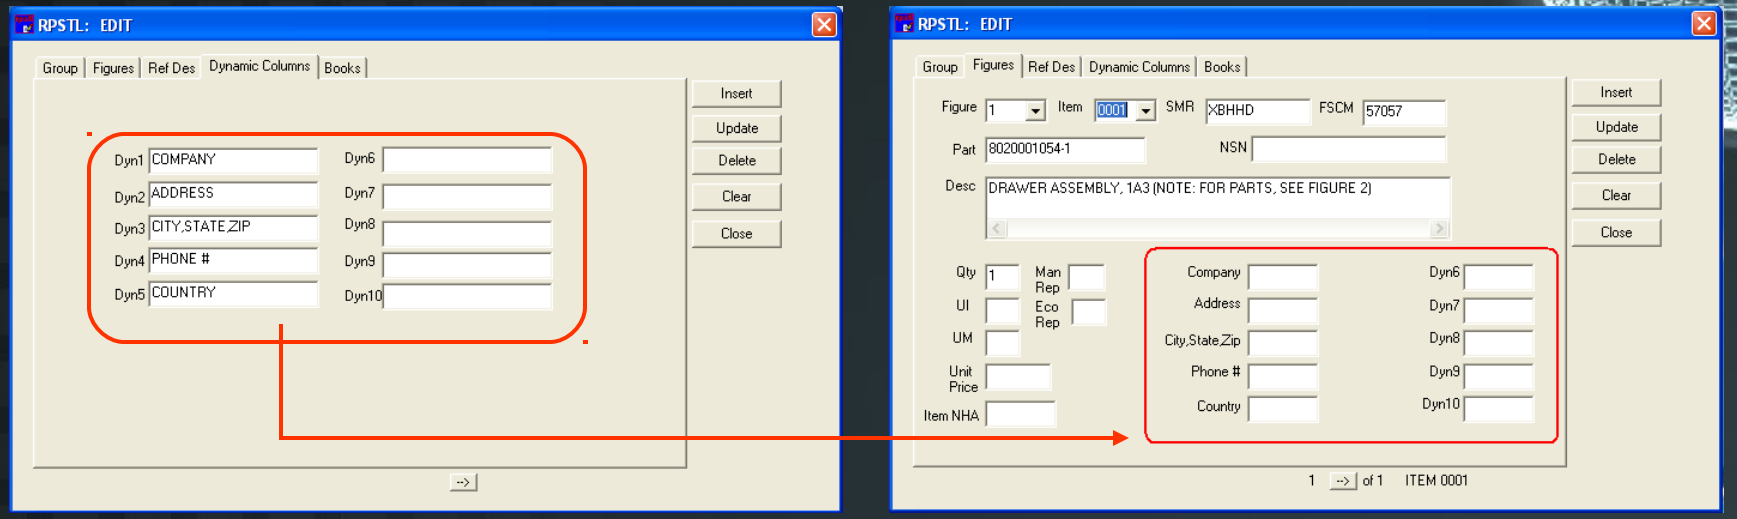
- In the event that an item number is used multiple times, the arrow button located on the bottom of the dialog can be used to scroll through the multiple items.

Edit Reference Designator



- The Reference Designator Form includes:
  - Reference Designator
  - Figure Number
  - Item Number

Edit Dynamic Columns



- The Dynamic Form includes:
  - text fields to name the ten dynamic fields used in the RPSTL.
